

How can we keep the burden of wound care from bleeding the system dry?

A patient, provider and payor perspective

Welcome to Mölnlycke® Talks Online

At Mölnlycke®, we value connecting with healthcare professionals from around the world. Join us for a roundtable discussion.

If the burden of wound care is bleeding health systems dry, is someone at fault, and what can be done to relieve this burden? As clinical and financial constraints collide, it's tempting to point fingers. But this doesn't take the whole picture into consideration.

Join the debate on:

- How different parts of the healthcare system can work together to reduce the burden of wound care
- Understanding outcomes as value and securing value for money by delivering appropriate patient outcomes
- Who is responsible for reducing the burden and achieving better outcomes and how?
- Balancing optimal patient outcomes with the health of the health system itself

Meet your fellow professionals and the Mölnlycke team at our live Q&A afterwards
